March Program

TAKING THE "LEED"

Wednesday, March 19, 2003
Sidewalk Daily Deli, Riverside

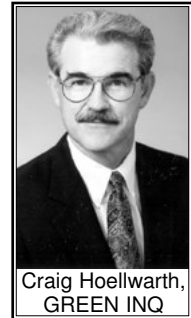

Over the past couple of years, another acronym has crept into our vocabulary. LEED. Perhaps the introduction paragraph from the Green Building Council's Web site sums it up best: "The Leadership in Energy and Environmental Design (LEED[™]) Green Building Rating System represents the U.S. Green Building Council's effort to provide a national standard for what constitutes a "green building." Through its use as a design guideline and third-party certification tool, it aims to improve occupant well-being, environmental performance and economic returns of buildings using established and innovative practices, standards and technologies."

In the past three years, several states and cities have adopted green building requirements. The states of Maryland, New York, Washington and Oregon have led the way. Cities such as New York, San Francisco, Oakland, Chicago, Portland, Vancouver and Seattle have also adopted some form of sustainable design guidelines. Many of these efforts have utilized the US Green Building Council's LEED program which has continued to evolve into a consensus national set of guidelines.

Where does California stand on this? Governor's Executive Order D-16-00 sets a goal for a higher standard for efficiency and quality of environment in state buildings. In response to this, the state of California's Sustainable Building Technical Group developed performance goals that require analysis of USGBC's LEED rating system as it applies to design and construction of applicable state construction projects. In addition, the Collaborative for High Performance Schools (CHPS) has developed guidelines and evaluation criteria for high performance schools.

Our guest speaker, Craig Hoellwarth will provide an update on the status of sustainable design in California. His presentation will include case studies on various envelope systems, renewable energy systems, and grants available for use of high efficiency and renewable energy systems.

Craig Hoellwarth is a special consultant to the energy and building industries. His firm, GREEN INQ, is located in Sacramento, California, where he provides professional services in the areas of energy and sustainable facility planning, "green" technology development, and business development for the building industry. He also leads the utility planning services group of GREEN INQ, providing strategic planning, marketing and program development services for public utilities in California and the Western States.

Mr. Hoellwarth is a past energy specialist for the California Energy Commission, where he managed the Warren-Alquist Advisory Committee and developed the first Title 24 energy performance standards for the State of California. He was also a program director for the AIA Research Corporation in Washington, DC, where he developed the national AIA Energy in Architecture program; and Supervisor of New Construction Services for the Sacramento Municipal Utility District (SMUD), where he developed and managed the New Construction Energy Advantage program. He is presently a member of the Geothermal Heat Pump Consortium team, working under a grant from the California Public Utilities Commission to promote and install GeoExchange systems in the Southern California Edison service area.

He is a member of the American Institute of Architects Committee on the Environment, the U.S. Green Buildings Council, the Sustainable Buildings Industry Council, and the Association for Efficient Energy and Environmental Systems. He is a graduate of California Polytechnic State University, San Luis Obispo, where he received degrees in Architecture and Engineering.

This month's program will be held once again at the Sidewalk Daily Deli (next to Riverside Blueprint), and dinner will be served. Reservations for this program may be made with the Chapter office, 909.799.7213, until noon, Monday, March 17.

Prices, with reservations / at the door, are:
Members, Guests \$15.00 / \$20.00
Associate Members &
Student Members \$12.00 / \$15.00
Non-Members \$20.00 / \$20.00

President's Message

David C. Agnew, AIA

What's in a Name?

My dear friend John Melcher, AIA, has on occasion introduced me as one of the best "Planners" he has ever met. As I respect my planner colleagues, I prefer, however, my hard-earned title of "Architect." It is true that a significant portion of my professional career has been in the practice of Urban and Regional Planning. It is also true that until the 19th century, architects were exclusively the "Master City Planners." With the introduction of "Planning" as a profession, architects now share this role with professionals who focus in this discipline. This is not unlike other traditional architectural services that are slowly transitioning to other professionals. In that same vein, names have a tendency of evolving and changing as well.

What's in a Name?

Los Angeles AIA - Inland District, and AIA Inland California

At the victorious conclusion of World War II, returning veterans were anxious to rebuild their lives, complete their education, begin professional careers and participate in the "American Dream." By 1956, a small group of young architects, full of energy and ideals, developed camaraderie marked by significant contributions to their communities in the Inland area. These men found themselves making the monthly exodus to Los Angeles to attend LA/AIA Chapter programs. Once, while returning to Riverside from a late night Chapter meeting, Clinton Marr, FAIA-E, came up with the idea that the Inland District, which was then part of the Los Angeles AIA Chapter, deserved to be its own chapter. Shortly thereafter, Amos W. Randall, AIA was inducted as the first president of the Inland District.

The members frequently met at The Mission Inn in Riverside. By 1964, Marr, then elected President of the District, made it his professional "mission in life to establish the Inland California Chapter." The Mission Group, as they were known amongst themselves, was comprised of American Institute of Architect members: Clinton Marr, Clare Henry Day, Jack Causey, James Calkins, Arthur Evans, William Cody, Jack Burg, Herman Ruhnau, Amos Randall, and E. Stewart Williams. These are the founding fathers of our Chapter.

Several names were suggested for the chapter, including "The Mission Chapter." However, because of the strong identity with the Inland area, the board members finally agreed on "Inland California." In 1966 Jack Causey became the first President of the AIA Inland California Chapter.

What's in a Name?

Like our Chapter's founding fathers, whose strong desire it was to become independent of the Los Angeles Chapter and identify themselves with the Inland area, some of us feel times have once again changed. It is time to consider a fresh name that reflects the current environment. In the mid-1960s, the Inland area was very much rural in nature. Urban community populations in the cities of Riverside and San Bernardino averaged 75,000 residents, where rural communities averaged about 10,000 residents, with a combined population of less than one million. The "Inland Empire" has grown to nearly four million residents today.

"AIA Inland Empire Chapter"? The current Executive Committee of the AIA Inland California Chapter is considering whether changing the name of the Chapter would be beneficial to our members. Would changing the name to "AIA Inland Empire Chapter" help promote business opportunities for our members by helping clients identify local architects with their unique expertise in the Inland Empire? Is local expertise important to our clients? Most would agree, and that's why we should take advantage of the national and international recognition that the Inland Empire enjoys as one of the fastest growing areas in the United States.

Recently I had a conversation with Chris Sahlin, AIA, Immediate Past President of our Chapter. He recalled that during last year's Grassroots conference and again at the National Convention, he had several occasions to introduce himself as a member of AIA Inland California to AIA members from across the country. Several members not familiar with California mistakenly thought our Chapter was located in the Sacramento valley. Chris explained the correct location. I've encountered this same situation as well, and described the Chapter area as east of Los Angeles, in the Inland Empire. Most had heard of the Inland Empire.

If it is the membership's desire to explore a name change it will require amending the Chapter Bylaws. A Bylaws Committee will soon be formed to begin work to amend outdated sections of the Bylaws to be compliant with current changes in practice and California state law. The ExCom is very interested in your input. Please forward comments to me at dcag@deainc.com or to the Chapter office at aiaic@empirenet.com.

I am grateful that our Chapter's founding fathers laid a solid foundation upon which to build. Clinton, thank you for your guidance.

Program Review

Producers' Council Night Joseph Filippi Winery

By Scott D. Limbacher, AIAIC Student Member

February's Chapter meeting was AIAIC's Producers' Council. The meeting was held at the historic Joseph Filippi Winery in Rancho Cucamonga, which has received many awards for varieties of locally produced wines made from California-grown grapes, and which is now under the direction of the third generation of the Filippi family.

The winery provided an atmosphere that is rich in heritage and complimented the tradition of the annual Producers' Council presentation. The Producers' Council is a professional trade association originally chartered by the AIA in 1920 to provide architects with access to highly reputable representatives of national manufacturers. The association has thirty members that visit with every Southern California chapter of the AIA each year. The following were in attendance:

Pictured from left to right, picking the lucky winners for the evening's drawing: Jim Hamm, Kimberly Shaw of W.R. Grace & Co., David C. Agnew, AIA and Maurice McCaulin of Thompson Building Materials.

Greg Clark and Joe Ramos, AIA.

Cal Poly Pomona Students:
Rollin Homer, AIAS President,
Matthew Perry, AIAS and Jeni Grob, AIAS.

Nearly 100 students from Cal Poly, Pomona were also in attendance at this month's meeting. Spaggi's of Upland, California catered the meal of salads and pastas.

Also present was Eric Jon Oates of Southern California Edison. Oates is the Technical Specialist/Consultant of the New Construction Services Division of SCE. He provided information of the "Savings by Design" programs that are available to new construction projects in the SCE service area. Eric can be reached at 909.357.6238 or by e-mail at oatesej@sce.com.

Scott D. Limbacher is an architecture student and Treasurer of the SBVC Architecture Club at San Bernardino Valley College. He is a licensed California General Building Contractor, a member of the Board of Directors of the Air Conditioning, Refrigeration, and Mechanical Contractors Association and a professional member of the International Conference of Building Officials. He is the Chairman of the Energy Management Committee at his job where he is the Vice President of Construction and Maintenance for Stater Bros. Markets.

Revitalized COTE Establishes Mission Statement

By Eric R. Shamp, AIA, LEED AP

A newly reorganized Committee on the Environment met this month to discuss events, resources, and goals for the year. A number of great ideas were brought to the table, many of which will be implemented in the coming months. Keep an eye on the calendar in this publication for COTE meetings and special events, including a speaker at this month's Chapter meeting. All interested persons, members and non-members alike, are welcome to COTE meetings.

In addition, the COTE will initiate an e-mail discussion list to provide a forum for posing questions, making contacts, and announcing events and seminars specific to the Inland Empire region. A formal invitation will be sent out via e-mail, or you can request inclusion on the list by sending a message to me at eshamp@hmcgroup.com.

A mission statement was developed to help guide and focus the activities of the committee. This statement, shown below, supplements the AIA National COTE mission statement, available at www.aia.org/cote.

Mission Statement for the AIA Inland California Chapter Committee on the Environment

The AIA Inland California Chapter Committee on the Environment (COTE) recognizes that the viability of future development depends on how carefully we use our resources today. We advocate the designer's role in providing healthy, safe, high performance, and cost effective environments for people to live, work, and learn in.

The architect is one of many participants in the sustainable design process. In consideration of this, participation in the COTE is open to all interested parties: AIA members, associates, and non-members alike. The mission of the COTE is:

- To promote and advance the ideal of sustainable, energy efficient, and environmentally responsible design in the Inland Empire.
- To serve Inland Empire architects, consultants, owners, developers, vendors, students, environmental organizations, and public officials as a clearinghouse for information and a facilitator of dialogue on regionally specific sustainable design issues.
- To help Inland Empire design professionals to become part of a larger community of sustainable design professionals.
- To acknowledge and publicize regional examples of sustainable design practice.

AIA Inland California Committee on the Environment: Herta Gaus, AIA, LEED AP, WLC Architects Shan McNaughton, AIA, Armantrout Architects and Eric R. Shamp, AIA, LEED AP, HMC Architects.

2003 AIAIC Home Tour

The AIAIC Home Tour for 2003 will be on Saturday, May 31. We are anticipating a very successful event and have lined up some very special homes. Two of the homes have already been chosen. The first, King Ranch, the home of the Honorable Jeff and Pam King, was designed by our own member Pete Pitassi, AIA. The second is the home and studio of AIAIC Honorary member, Sam Maloof. We are especially blessed that these gracious people have opened their homes for this event.

We are planning to feature five homes on this year's tour. This is where you come in. In plain words, we need your help. We need a core team of leaders that will plan the details and supervise the event at each home. To feature five homes, we will need 5 house captains and 5 assistants. The house captains will be responsible for setting up the home and coordinating the docents. The assistants will fill in for them and allow

all members of the team time to tour the other homes. We will also need 6 to 10 docents per home. Docents will work in shifts. The morning crew will tour the homes in the afternoon and the afternoon crew will tour the homes in the morning. If this sounds like a lot of people - it is. That's why we need your help. The good thing is, if you volunteer as a supervisor, assistant or docent you will receive a free ticket for the event. Family members and friends are welcome to participate.

We also need help lining up sponsors. We need a florist to supply flowers at each home and we are open to ideas that will provide sponsors an opportunity to showcase their work and enhance the event. If you have ideas, please let us know.

Let's make this a special day. There seems to be something about a home tour that brings out the best in all of us. Contact Florence Holt at 909.799.7213 to volunteer. We are counting on you!

BEEP Handbook

The *Built Environment Education Program*, a handbook for teachers and architects produced by the California Architectural Foundation, is available to check out from the Chapter office. Call 909.799.7213 for further information.

Architect Seminar The Benefits of Geexchange Heating and Cooling Technology

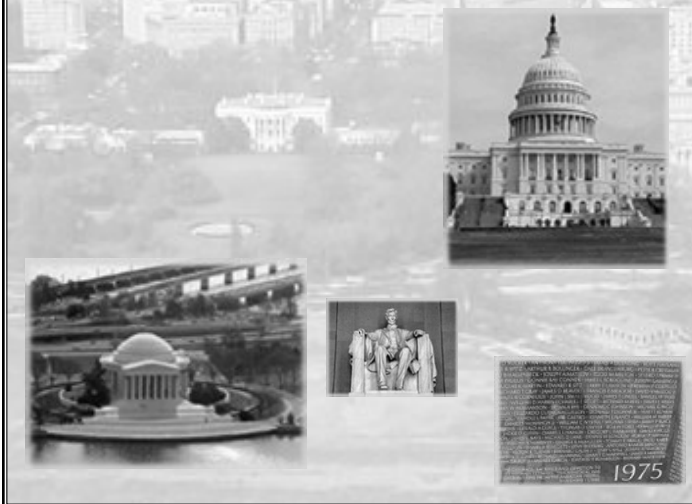

Architects interested in learning more about the potential of geexchange heating and cooling technology for building design should make plans to attend one of the following seminars planned in Southern California this year: April 16 at the Holiday Inn Palm Mt Resort, 155 S. Belardo, Palm Springs, from: 11:30 a.m. - 3 p.m. or May 14 at Southern California Edison's CTAC Multipurpose Room, Irwindale, from: 11:30 a.m. - 3 p.m. The seminar will provide information on the many energy and environmental benefits of geexchange technology, including a cleaner building design, lower operating and maintenance costs and a more comfortable environment. Those who attend will be eligible to receive AIA Continuing Education credits (3 HSW). Lunch is included. For more information or to register for the seminar, contact AEEES at 530.750.0135.

Frederick P. Rose Architectural Fellowship

The Frederick P. Rose Architectural Fellowship offers new architects devoted to community service the opportunity to create meaningful change for people and places. Rose Fellows identify and partner with a mentor and a local non-profit in a low or moderate-income community. They work hands-on with neighborhood residents and leaders to improve

Prelude to 2003 Grassroots

Shown below are few photographs that David C. Agnew, AIA, took in between Grassroots conferences in Washington, DC last year. Keep an eye out for next month's "President's Message," when Dave will give us a full report.

affordable housing and promote responsible community development. Fellows receive extensive mentoring opportunities with national leaders in design, affordable housing and community development.

The three-year Fellowship provides an annual \$40,000 stipend plus benefits. It is open to recent graduates of an accredited college or university with a master's degree in architecture and to caring, talented professionals with up to five years of post-graduate work experience.

Applications must be received by March 31, 2003. For an application and more information, go to www.enterprisefoundation.org or contact Stephen Goldsmith, Director, Frederick P. Rose Architectural Fellowship, The Enterprise Foundation at sgoldsmith@enterprisefoundation.org or 435.655.3226.

ASLA ASSEMBLES IMPRESSIVE AWARDS JURY

The American Society of Landscape Architects (ASLA) 2003 Awards jury will include the design critic of *The Washington Post*, a popular author, the chief landscape architect of the Forest Service, three leading educators, and three award-winning practitioners:

- **J. Brooks Breeden, FASLA**, Professor and Head, Landscape Architecture Section, The Ohio State University
- **Benjamin Forgey**, Architecture Critic, *The Washington Post*
- **John Jackson III, ASLA**, Jackson Person & Associates, Inc., Memphis, TN
- **Joseph J. Lalli, FASLA, EDSA**, Fort Lauderdale, FL
- **Carol Mayer-Reed, FASLA**, Mayer/Reed, Portland, OR
- **Witold Rybczynski, Hon. FAIA**, Author, *A Clearing in the Distance*, *Home*, and *The Perfect House*, among other books, and Meyerson Professor of Urbanism, University of Pennsylvania
- **Frederick R. Steiner, ASLA**, Dean, School of Architecture, University of Texas at Austin
- **Ramiro Villalvazo, ASLA**, Chief Landscape Architect, USDA Forest Service
- **Joan H. Woodward, ASLA**, Professor and Graduate Coordinator, California State Polytechnic University, Pomona.

The 2003 Awards Program Call for Entries will be available in early March. Submissions will be due by May 16, and the jury will convene June 20-22 in Washington, DC. Awards categories include Design, Analysis & Planning, Research, and Communications. The jury will also present a new award, the Community Service Award, and The Landmark Award (formerly The Classic Award).

ASLA will announce the jury's selections on June 23 and the Awards Ceremony will be held during the ASLA Annual Meeting, October 30-November 3, in New Orleans.

2003 NAC Awards Program

The National Associates Committee is hosting its annual awards program at the AIA National Convention in San Diego. It will recognize outstanding accomplishments by Associate members, as well as firms and registered architects, who have contributed significantly to the development of Associate members. For more information go to www.aia.org/institute/associates.

AIAIC Student News

The American Institute of Architecture Students (AIAS) at California Polytechnic University, Pomona would like to invite members of the AIAIC to the 2003 College of Environmental Design Career Fair. The ENV Career Fair will be held on campus in the College of Environmental Design on Wednesday, April 24, 2003. This event is a professional job fair and is an excellent opportunity for firms to interview students for internships and permanent positions. In addition, it acts as a means for promoting greater interaction between firms, students, and vendors. At this event, firms will get an opportunity to meet, talk to and gather information from students and other professionals.

The Department of Architecture at Cal Poly Pomona offers fully accredited degrees in both the undergraduate and graduate programs. There are approximately 483 undergraduates and 52 graduate students in the architecture program. All 535 scholars are educated with a broad foundation in design, computer and hand drafting, model building, building construction, professional practice, and management. The College of Environmental Design also has a remarkably successful international exchange program that enhances students' abilities to see various types of design all over the world.

This student-run event is organized by a group of scholars who are proud to announce that students from all of the other disciplines within the College of Environmental Design will be attendance. This will give firms the opportunity to interview and interact with students and firms from the disciplines of: Urban and Regional Planning, Landscape Architecture, Art, and Regenerative Studies.

Companies who wish to attend the event are asked to make a \$125 tax-deductible donation to AIAS at Cal Poly Pomona. Each additional table(s) will be charged an extra \$125. If you are interested in attending please contact Rollin Homer at 909.938.1739.

AIAS field trip tour of an elementary school and a middle school being constructed by PCM3 for the Val Verde USD, close to Perris Dam on January 25, 2003.

AIA 2003 Architectural Photography Competition

AIA St. Louis announces the annual AIA Architectural Photography Competition to promote appreciation and awareness of the built environment as captured in images by architects. The competition is open to all architects registered in the United States and to associate and student members of any AIA chapter or AIAS. Entries are now being accepted through April 1, 2003.

Steven Strassburg, editor of *Iowa Architect* magazine, will chair this year's jury, with assistance from Kiku Obata of Obata & Company Design, and professional photographer Michael Eastman.

The entries must have an architectural theme or must contain some element of the man-made environment. The jury will use the photographic interpretation of the subject matter as their main criteria for judging, not the architecture itself.

Cash awards are: First place, \$500; Second place, \$400; Third place, \$300; Louise Bethune, \$200 (subject must be of American architecture - Louise was the first female registered architect in US); and digital category, \$200.

A total of fourteen images will be selected to be honored for display at the upcoming AIA National Convention. All entries are then presented to Universe Publication to produce a calendar of the winning entries plus approximately 40 other images, each with an acknowledgement.

The entry fee for AIA members is \$30; entry fee for AIAS members is \$15; entry fee for registered architects who are non-members of AIA is \$50. Entrants may submit up to five slides for each entry fee and may enter as many times as desired. Please visit www.aia-stlouis.org to download an entry form or call 314.621.3484 with questions.
