Attend the Product Show and keep up to date with current industry products & services. Many vendors will be on hand to show their wares and answer your questions. Network with professionals like yourself and share common interests, goals & strategies.

Our host, Simpson Strong-Tie will provide us with a tour of their facilities and a review of their products and services. They are the world's largest manufacturer of structural connectors, working with architects, engineers, and contractors to ensure buildings are constructed properly. They have a test lab in Riverside, where shear walls, moment frames and concrete anchoring systems are evaluated. They also have a demonstration room, where they will show the proper installation of their products.
