So You Want To Be An Architectural Firm?

Presented by:

David E. Barker, esq.
Collins Collins Muir + Stewart LLP

[Visit their website](#)

This is the stuff you don't learn at architectural school. You want to start or have an architectural practice? Great! But what kind of business should you have? A sole proprietorship or a corporation? What are the forms that the CAB wants you to file in connection with your business? How about contracts - are there important things you should be thinking about when looking at or signing a contract? Employment? Intellectual property? Insurance? Succession planning? It's a lot - but in this seminar we will touch on all of these issues and give you some information of what you need to know to run the business side of your business so that you can spend more time focused on design.
